(54) Title: IMPROVEMENTS IN OR RELATING TO CLOTHING

(57) Abstract: Figures 7 and 8 show a breast support apparatus (500) for use with any garment. The sling or wrap of material (501) is elasticated or 'stretchable' and non-slip, for example, being of cotton/polyester. The sling or wrap of material (501) has been shaped as shown with the ends (501a, 501b) being narrowed to the width of elasticated, connecting strap (502), said ends (501a, 501b) being joined to the strap and to one another, for example, by appropriate stitching. The ends (501a, 501b) of the strap are passed through an opening in metal connecting buckle (503) of the connecting strap (502). The connecting strap (502) may be used to connect or hook the breast apparatus (501) to an appropriate location on an outer garment.
